Bill Form Definitions

Service Charge: A fixed monthly charge related to metering, billing and account maintenance.

Distribution Charges (Gas): Charges related to delivering gas through pipes from supply sources to the customer. These charges include a therm component, and in November through March on certain rate schedules, also include a demand component.

Bill Form Definitions (continued)

Balancing Charge (Gas): This charge reflects storage related costs associated with winter gas use. This charge is only applicable in the billing months of November through March.

Demand (Gas): The highest average daily use of gas over the most recent billing months of November to March.

Supply (Gas): Charges for customers who do not choose a competitive gas supplier are called Basic Gas Supply Service (BGSS). The charges include the cost of the natural gas as well as the cost of interstate delivery of the gas to New Jersey.

Distribution Charges (Electric): Charges related to delivering electricity through wires from supply sources to the customer. These charges include both kilowatthour (kWh) and demand (kW) components.

Measured Demand (Electric): The maximum use of electricity at any time during a month or monthly time period (on or off-peak).

Annual Demand (Electric):

(For Rate HTS): The highest Measured Demand over the most recent 12 months.

(For Rates MD, ED, LPLS, LPLP): The highest Measured Demand in any time period in the current month.

Summer Demand (Electric): The Measured Demand (excluding off-peak) in each billing month of June through September.

Societal Benefits: This charge recovers the cost of government mandated programs designed to achieve public policy goals, such as energy conservation.

Securitization Transition: This charge recovers costs and associated taxes for transition bonds and for BGS transition bonds collected by PSE&G as servicer on behalf of PSE&G Transition Funding LLC and PSE&G Transition Funding II LLC, respectively.

Supply Capacity (Electric): A customer's share of the generation and transmission facilities, measured in kilowatts (kW), which must be procured to serve the system annual peak usage. The customer's share is calculated from the customer's peak usage in the prior year's summer. For new customers without prior summer usage the share is calculated from connected load.

Supply (Electric): Charges for customers who do not choose a competitive electric supplier are called Basic Generation Service (BGS). The charges include the energy as well as the generation and transmission facilities necessary to produce and transmit the energy.

Your bill is now past due. Payment of \$12,129.60 must be received by 10/3/2017 or service may be shut off. A security deposit may be required if late payments continue. A statement of customer rights and fees is shown on the reverse side.

This bill reflects BPU approved changes, effective September 1, 2017, to the Supply and Delivery portions of your electric bill. The change in the Supply portion is the result of an increase in transmission charges if you receive PSE&G's Basic Generation Service (BGS). The change in the Delivery portion is the result of an increase in the Electric Base Rates due to Energy Strong investments, as well as the approval of the new Energy Efficiency 2017 Program included in the Green Program Recovery Charge. Due to these changes, a typical residential customer who purchases supply from PSE&G, and uses 750 kilowatt-hours in a summer month and 7,200 kilowatt-hours annually, will see an annual increase of \$6.24 or approximately 0.50%. Tariff information may also be found by visiting pseg.com/tariffs.

DIRECT ENERGY BUSINESS, LLC Electric Charges	634.49
Total Amount Due On Oct 12, 2017	\$13,870.11

This bill reflects BPU approved changes, effective September 1, 2017, to the Supply and Delivery portions of your electric bill. The change in the Supply portion is the result of an increase in transmission charges if you receive PSE&G's Basic Generation Service (BGS). The change in the Delivery portion is the result of an increase in the Electric Base Rates due to Energy Strong investments, as well as the approval of the new Energy Efficiency 2017 Program included in the Green Program Recovery Charge. Due to these changes, a typical residential customer who purchases supply from PSE&G, and uses 750 kilowatt-hours in a summer month and 7,200 kilowatt-hours annually, will see an annual increase of \$6.24 or approximately 0.50%. Tariff information may also be found by visiting pseg.com/tariffs.

Take back your desk! Go paperless! Instead of receiving a paper bill each month, you get a monthly email showing your bill amount and due date, with the ability to view or print your current and past bills. To sign up, log in to My Account at pseg.com, and select "Paperless Billing."

This bill reflects BPU approved changes, effective September 1, 2017, to the Supply and Delivery portions of your electric bill. The change in the Supply portion is the result of an increase in transmission charges if you receive PSE&G's Basic Generation Service (BGS). The change in the Delivery portion is the result of an increase in the Electric Base Rates due to Energy Strong investments, as well as the approval of the new Energy Efficiency 2017 Program included in the Green Program Recovery Charge. Due to these changes, a typical residential customer who purchases supply from PSE&G, and uses 750 kilowatt-hours in a summer month and 7,200 kilowatt-hours annually, will see an annual increase of \$6.24 or approximately 0.50%. Tariff information may also be found by visiting pseg.com/tariffs.

This bill reflects BPU approved changes, effective September 1, 2017, to the Supply and Delivery portions of your electric bill. The change in the Supply portion is the result of an increase in transmission charges if you receive PSE&G's Basic Generation Service (BGS). The change in the Delivery portion is the result of an increase in the Electric Base Rates due to Energy Strong investments, as well as the approval of the new Energy Efficiency 2017 Program included in the Green Program Recovery Charge. Due to these changes, a typical residential customer who purchases supply from PSE&G, and uses 750 kilowatt-hours in a summer month and 7,200 kilowatt-hours annually, will see an annual increase of \$6.24 or approximately 0.50%. Tariff information may also be found by visiting pseg.com/tariffs.

Don't Fall Victim To Scams! PSE&G alerts business customers to payment scams in its service area. Scammers pretending to be PSE&G employees are calling customers and threatening to terminate service if they do not receive immediate payment via a pre-paid credit card. If you receive a suspicious call, hang up and call the PSE&G Business Solutions Center at 855-BIZ-PSEG, Monday - Friday, 7 a.m. to 5.30 p.m.
