

Does your tween or teen have an eye for beauty? Are you raising a bosskid? The Beauty Entrepreneur Camp will empower children to work together as they create their own Beauty Businesses. Each camper will dive into all aspects of the beauty business. Starting off with deciding on a company name and design their company logo using online apps. They will engineer their own custom formulations as they learn the science behind the benefits of using nature's beauty ingredients. They will develop an understanding of how to cost and price their products and how to promote and market their products to generate sales. Daily confidence building and creative self-esteem exercises will reinforce the importance of taking care of themselves and their bodies. All while having fun making natural products and building a business!
